

Renato Ruis aka Tim DevOps

Senior DevOps Engineer

📍 Portugal · Remote · distributed teams ✉ renatoruis@linux.com [in LinkedIn](#) 🌐 timdevops.com.br

Hey, I'm Renato, but most people know me as Tim. Senior DevOps Engineer with 8+ years building and scaling cloud platforms for e-commerce, fintech, pharma and logistics. Kubestronaut: all five CNCF Kubernetes certifications (CKA, CKAD, CKS, KCNA, KCSA). I've cut deployment time by up to 70% with CI/CD and GitOps, saved real money with FinOps, and moved entire Kubernetes platforms across clouds with barely any downtime. And I truly believe great infrastructure starts with people: transparency, blameless culture and staying calm when things catch fire.

Kubernetes Expertise

- ✓ All 5 CNCF certifications (CKA, CKAD, CKS, KCNA, KCSA), plus OCI Kubernetes Specialist
- ✓ Production experience with EKS, GKE, OKE, K3s, Rancher, ECS and bare-metal clusters
- ✓ Led full cluster replatforming: EKS/GKE to OKE migration, including MySQL/PostgreSQL with minimal downtime
- ✓ Security-first mindset (CKS): secrets management, network policies, hardening, supply-chain awareness

How I Work

Blameless by default

Incidents are learning opportunities, not trials. I build postmortem cultures where people feel safe telling the truth fast. That's how MTTR actually goes down.

Mentorship & hiring

Currently leading the expansion of the Infra/DevOps team at eureciclo: hiring, mentoring and standardizing good practices so the team scales beyond me.

Calm under pressure

Years of SRE on-call taught me that a calm voice in an incident channel is worth more than a clever script. I de-escalate first, debug second.

Tech ↔ business translation

I explain infrastructure decisions in terms of cost, risk and speed, so non-technical stakeholders can actually make decisions.

Cross-team enablement

I measure my success by how autonomous other teams become. Documentation, golden paths and pairing over gatekeeping.

Experience

Senior DevOps Engineer | SRE @ eureciclo

May 2023 - Present

Cross-team DevOps/SRE in a multi-cloud environment (AWS, GCP, OCI), owning infrastructure architecture, migration, operations and cost optimization for a fast-growing sustainability scale-up.

- Led multi-cloud Kubernetes replatforming: EKS/GKE to OKE, migrating MySQL/PostgreSQL with minimal downtime
- Established GitOps with Argo CD and CI/CD with Bitbucket Pipelines: faster, auditable, reversible deploys

DevOps Consultant | SRE @ Builders

Dec 2020 - May 2023

DevOps consultant for large enterprise clients in pharmacy (Raia Drogasil, Grupo DPSP), transportation and banking, operating complex AWS/GCP cloud-native environments.

- Designed and optimized CI/CD pipelines with GitLab CI, Bitbucket Pipelines and GitHub Actions across multiple teams
- Built and scaled Kubernetes/Docker platforms for high-traffic e-commerce and core-business workloads

DevOps Engineer | SRE @ FCamara Consulting & Training

Dec 2018 - Dec 2020

Core DevOps engineer for TempoTem, a high-growth startup, owning infrastructure and security decisions from the earliest stages.

- Designed scalable AWS infrastructure supporting rapid product growth
- Ran containerized workloads with Docker and Kubernetes; CI/CD with Bitbucket Pipelines

DevOps Engineer @ Concrete Solutions (Accenture Group)

Jan 2017 - Dec 2018

DevOps for major enterprise clients (SKY, Carrefour, Cielo), building automated deployment pipelines for native mobile apps in SCRUM teams.

- Built Jenkins pipelines automating Android/iOS releases end-to-end, cutting manual work and time-to-market
- Operated AWS-based infrastructure for high-demand e-commerce platforms

Site Reliability Engineer @ Carrefour Brasil

Jan 2015 - Jan 2017

First SRE role: built monitoring and reliability foundations (Zabbix, AppDynamics, Rundeck) for Carrefour's early e-commerce in Brazil.

Technical Support Coordinator @ Luft Solutions

Aug 2010 - Oct 2015

Infrastructure analyst → coordinator; led IT support across logistics distribution centers in four Brazilian states (Carrefour, Amazon, Louis Vuitton).

Core Skills

Containers & Orchestration

Kubernetes (EKS, GKE, OKE, K3s, Rancher, bare-metal) Docker Helm

CI/CD & GitOps

Argo CD Flux CD GitHub Actions GitLab CI Bitbucket Pipelines Jenkins

Observability

Prometheus Grafana Alertmanager OpenTelemetry Loki/Tempo ELK/OpenSearch Datadog Zabbix

Cloud

AWS OCI GCP Azure (working knowledge) Hetzner DigitalOcean

Infrastructure as Code

Terraform Ansible CloudFormation

Other

Linux (advanced) FinOps Bash/Shell Python Kafka Kong API Gateway MySQL/PostgreSQL/MongoDB AI/LLM-assisted workflows

Certifications

✳️ **CKA — Certified Kubernetes Administrator (CNCF)**

✳️ **CKS — Certified Kubernetes Security Specialist (CNCF)**

✳️ **KCSA — Kubernetes and Cloud Native Security Associate (CNCF)**

- OCI Kubernetes Specialist — Oracle
- OCI Cloud Foundations Associate — Oracle
- AWS Certified SysOps Administrator
- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect – Associate (expired)
- Microsoft AZ-900
- Cybersecurity Awareness (CAPC) — CertiProf
- ITIL — AXELOS
- Scrum Foundations — CertiProf
- ISO 20000 / ISO/IEC 27002 — EXIN

✳️ **CKAD — Certified Kubernetes Application Developer (CNCF)**

✳️ **KCNA — Kubernetes and Cloud Native Associate (CNCF)**

Education

Analysis and Systems Development (IT)

UNINTER — Centro Universitário Internacional
2017 - 2019

Languages

Portuguese Native

English B1/B2 - actively improving

Two international immersion courses (Canada 2024, South Africa 2021) and daily use in distributed teams. Clear written and async communication, conversational speaking, and a real ongoing plan to reach full fluency. I'd rather be upfront about this than oversell it.

Also known as Tim DevOps — friends nicknamed me after Tim Maia, a legendary Brazilian singer. The resemblance is debatable.
